CSE Social Gathering Event 2019

Written by: Nourhan Ahmed

On January 2019, the department of CSE had organized the 5th CSE Social Gathering aiming to encourage more interaction between the students and the faculties. The event was organized by Eng. Farah Alqawasma (Teaching assistant in the CSE department) and three other senior students (Nada Abdallah, Nourhan Ahmed and Wasmia Aldosari).

The event consisted of three multiple different activities. At the beginning, the attendees were free to take a tour between the multiple booths and different activities. Thanks to The Cyber Security Club and the Computing Club members who took place in the booths explaining for the students their activities and to share some great games with them. Other booths were the arts and crafts booths in which the talented students were presenting their talents such as drawing Caricatures and Arabic handwritten names. In addition to that, the winners of the DELL competition that was held on 2018 were explaining to the students their journey and how they were able to win.

In this event, it was a pleasure to host two brothers' faculty members from the CSE department: Dr. Abdullah Al-Ali and Dr. Abdelaziz Al-Ali. They discussed their life journeys with the students and how they both ended studying the same major and working on the same department.
