

CSE and Industry

CSE/Huawei collaboration for Talents Cultivation

VP Huawei Qatar, F. Khan, and a team from Huawei visited CSE department Mid-October 2017 for several sessions and meetings. Among these, Huawei presented to CSE students the 1st Huawei ICT Skill Competition, which is a globally coordinated event, run remotely over the web and gives students in Qatar the opportunity to participate and compete for a number of prizes (including a travel overseas to China). This is a great opportunity for CSE and Huawei to cooperate as three students from Qatar will be selected at the national level, then these students will be invited to join international competition level in China.

Further collaboration issues have been discussed between CSE and Huawei teams, and will lead to further R&D collaborations.

Good luck to CSE students!
