

Cooperation between the Interior and Qatar University in the field of industrial security

The General Department of Industrial Security at the Ministry of Interior and Qatar University held a coordination meeting to strengthen cooperation and coordination frameworks in the training fields related to the work of the General Directorate of Industrial Security. The meeting was attended by Khalifa Mohammed Al-Attiyah, Assistant Director of the General Department of Industrial Security, Dr. Abbas Amira, Assistant Dean of the Faculty of Engineering for Research and Studies, and Dr. Sumaya Ali Al-Ali Head of Computer Engineering and Science Department, Qatar University. Mr. Khalifa Al-Attiyah emphasized on the importance of joint cooperation between the General Administration of Industrial Security and Qatar University in providing expertise, studies and scientific research in the field of management work. He pointed out that the directives of the Ministry of Interior are to strengthen cooperation and coordination with Qatar University and scientific research centers in the country.

He added that the General Directorate of Industrial Security seeks to develop the system of work and benefit from the expertise in all universities and research centers, and upgrade the industrial security man to the required level of security sense, professional accuracy, objectivity, hard work and the use of technology to fulfill its vital role in securing oil and gas supplies in the country. Dr. Abbas welcomed the cooperation with the Ministry of Interior represented by the General Administration of Industrial Security and provide all the scientific capabilities required by the training program within the administration, providing a brief description of the research efforts and scientific studies carried out by the university and the engineering projects it provided.
